

01.

Material specification

Product

Portable liquid-tight floor — Light Duty

Model

F100.020 (foam edges 7 cm)

Manufacturer

Buitink Technology, Duiven, The Netherlands

Date

2026-09-05

Version

01

Light Duty Floor — fabric type B680

The light entry-level version: fabric-reinforced PVC of **approx. 680 g/m²** with 7 cm foam edges. Compact, quickly deployed and suitable for light applications — no blower and no power required.

Fabric type	Buitink B680 (Light Duty)
Base fabric	polyester, PVC-coated both sides
Total weight	approx. 680 g/m²
Finish	glossy
Edges	foam-filled, 7 cm high — no power required
Standard colour	red
Full fabric datasheet	on request

The Light Duty Floor is supplied without a Kiwa certificate. For applications where liquid-tightness must be demonstrated to regulators, we recommend the Standard or Heavy Duty version.

Light and compact: rolled out and ready in minutes.

Application

- Cars, motorcycles and small equipment.
- Occasional use: detailing, small workshops, events.
- Locations without a power supply (foam edges).

Regular or heavier use? Choose the Standard Duty (900 g/m², Kiwa) or Heavy Duty (approx. 1,400 g/m², Kiwa) — both available with inflatable or foam edges.
